Executive Summary:

The Hogwarts Database started out as a fun way to learn about Databases while also playing with familiar fictional data. Over time, it became a database we hoped that the Headmasters and Professors at Hogwarts would actually use. One of the most difficult steps in the database design process was choosing which entities from the fictional Harry Potter universe would be useful to the user. In terms of implementation, we had to balance learning the concepts of SQL and being realistic about which framework to develop our web app in. Both Aimee and Wanda wanted to learn Flask but in the end familiarity with Node.js won out and allowed us to work more cohesively together. We both encountered several frustrating roadblocks with configuring Node and Handlebars. Having to troubleshoot those issues severely impacted our time to create a continuous integration environment for our project via GitHub, so we both had to put in more time, energy, and effort to make sure we were available to collaborate together in real time. If we were to work on such a project together again we would probably prioritize getting things set up in such a way so that we could see each others' changes in real time.

The Step process by which we submitted Drafts and received feedback was incredibly useful in working on this project and ultimately helped us develop a product we are proud of. In the first two steps of the draft process, we were able to standardize the naming of our entities. We were also able to make sure the relationships between the entities were cohesive. An example of this is that we connected Students to Subjects via a ClassRegistration table with a M:M relationship. In Step three of the draft process, we started working on implementing the Create, Read, Update, and Delete functions for our entities. The feedback we received from our classmates encouraged us to make our database more functional, such as with the Cascade On Update and Delete options. Ultimately, that progress helped the CRUD steps easier to implement when it came time to connect our database to our webapp. We also simplified our Locations entity by taking out irrelevant information which was making its functionality confusing. In Step Four of the project process, we took what we learned to fully implement CRUD steps for the Students entity. In the last step of the draft process, we implemented the remaining CRUD steps for the remaining entities. We also used the feedback we received from classmates to make our web pages more user friendly. In the end, this was a great project to work on together and we are both proud of the product we created.

Updated versions of the Project and Database Outlines:

a) Overview:

Hogwarts School of Witchcraft and Wizardry has a total student population of approximately 1,000 students/year. Each year each student is required to take 7 core subjects (there are nine to choose from). Hogwarts has a total of 14 teachers, some of whom are Heads of Houses and some are only instructors. There are four houses that the students are dispersed between and sorted into. A database website will track 7 Entities: **Students**, **Houses**, **Headmasters**, **Subjects, Locations, and Pets.** Students can have a pet and the database can track who owns which pet and what species it is.. The database can track which headmaster is head of which house, where a house or subject is located at the castle, and which house a student is in. A class registration table can track which students are registered in which classes. Additionally, a student's year in school may possibly be able to dictate other potential variables such as: whether or not they can go to Hogsmeade or the examinations they will be taking that year.

b) Database Outline, in Words:

- **Students**: records the details of the Students currently enrolled at Hogwarts
    - studentID: int NOT NULL, Primary Key
    - studentName: varchar 45 limit, not NULL
    - studentHouse: int, NOT NULL,FK Houses:houseID
    - yearInSchool: int, NOT NULL
    - **Relationship**: A Student has one house and a house can have multiple students.,M-M between Student and Subjects.
    - **Team Member Responsible: Aimee**

- **ClassRegistrations:** a table to track relationship of Students to Subjects
    - registrationID: int, NOT NULL, Primary Key, AI
    - student: int, NOT NULL, FK Students:studentID
    - subject: int, NOT NULL, FK Subjects:subjectID
    - term: varchar 45 limit, NOT NULL
    - **Relationship:** M:M multiple students are in each class and each student has multiple classes
    - **Team Member Responsible: Aimee**

CS 340 Final Project
Project Group 45
Project URL: http://flip1.engr.oregonstate.edu:9507/ (Please note you must be on VPN to view)
06/01/2021

- **Houses**: records the House the student was sorted into
  - houseID:int, NOT NULL, Primary key, AI
  - houseName: varchar, 45 limit, NOT NULL
  - headMaster: int, NOT NULL, FK Professors:employeeID
  - location: int, NOT NULL, FK Locations:locationID
  - **Relationship**: 1-M from House to Students
  - **Team Member Responsible: Wanda**

- **Subjects**: records the subjects currently being taught at Hogwarts
  - subjectID, int NOT NULL, AI
  - subjectName, varchar, 45 limit, NOT NULL
  - coreSubject, boolean, NOT NULL
  - classLocation: int, FK Locations:locationID, NOT NULL
  - instructor: int, FK Professors:employeeID, NOT NULL
  - **Relationships**: One student can have many subjects. A professor can only teach one subject. One student can have 7 core subjects but has nine subjects to choose from. One subject can have many Students enrolled. This shows that Subjects to Students is a M:M relationship, which reflects that we are implementing what our reviews suggested.
  - **Team Member Responsible: Aimee**

- **Professors**: records the professors currently teaching at Hogwarts
  - employeeID, int, NOT NULL, Primary Key, AI
  - professorName: varchar 45 limit
  - **Relationship**: 1-1 relationship between professor and Subject, 1-1 relationship between House and Professor
  - **Team Member Responsible: Aimee**

- **Pets:** records the pets living at Hogwarts
  - petID: int, NOT NULL, Primary Key, AI
  - petName: varchar 45 limit
  - studentOwner: int, FK Students:studentID NOT NULL
  - species: varchar,45 limit,
  - description: varchar, 100 limit
  - **Relationship:** One student can have up to two pets and each pet has only one owner
  - **Team Member Responsible: Wanda**

Page number: 4/9 May 11, 2022 at 12:46 AM

Sample Data for Locations:

locationID	locationName	description
1	Gryffindor Common Room	The Gryffindor tower entrance is on the seventh floor in the east wing of Hogwarts Castle
2	Ravenclaw Common Room	The Ravenclaw tower is found on the west side of Hogwarts Castle
3	Hufflepuff Common Room	The Hufflepuff basement is below ground level behind a stack of barrels near the kitchens of Hogwart
4	Slytherin Dungeon	The Slytherin Common room is located in the dungeons, behind an apparently blank stretch of wall of
5	Greenhouses	On the castle grounds, located at the back of the castle
6	Dungeons	Dungeons of Hogwarts Castle
7	Classroom C3	Iron chandelier hangs from the ceiling, as well as a dragons skeleton
8	Divination Classroom	North Wing accessible through a circular trapdoor a cross between somebodys attic and an old-fashion
9	The Great Lake	A freshwater loch located to the south of Hogwarts Castle. Contains a giant squid, Merpeople, Grindy
10	Hogsmeade Station	Where the Hogwarts Express arrives every year
11	Great Hall	Where each student gets sorted their first year, and where all meals and events occur. In Hogwarts
12	Quidditch Pitch	Where all Quidditch practices and matches occur
13	Whomping Willow	A mysterious tree used to disguise the opening to the Shrieking Shack in Hogsmeade
14	Hogsmeade	The only all-wizarding village in Britain where you have to at least be a 3rd year to be allowed to
15	The Forbidden Forest	A forest that borders the edges of Hogwarts Castle, housing many dark and dangerous creatures
16	Hagrids Hut	Where Professor Hagrid lives and where you go to attend Care of Magical Creatures
17	The Owlery	At the top of the Castle West Tower, all of the owls used by staff and students are housed here
18	Astronomy Tower	The tallest tower at Hogwarts Castle
19	Classroom 2E	located on the third floor, on the Charms corridor Hogwarts Castle
20	Classroom 4F	located on the first floor of Hogwarts Castle
21	Muggle Studies Classroom	on the first-floor, accessed through a showroom displaying Muggle artefacts
22	Classroom 1B	on the ground-floor, around the Middle Courtyard
23	Room of runes	room of runes
